

OPEN SOURCE LOAD BALANCER

## Elevate Your Business Security and IT Infrastructure with a Custom ADC Solution

Boost application security and continuity with an open-source ADC, that maximizes IT infrastructure flexibility. Additionally, save up to \$470 K per incident with AI and SKUDONET solutions, further enhancing your organization's risk management and cost-efficiency strategies.

### Massive-Scale Data Management

Elevate your data capabilities with application firewall features.

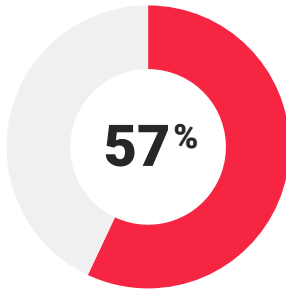

### Load Balancing and High-Availability

Optimize your network's performance and reliability.

### Cybersecurity & DDoS Protection

Defenses against cyber threats and DDoS attacks.

## Enterprises Will Look at Alternatives to Traditional ADC Solutions

For mid-sized and large enterprises, this solution is frequently too expensive, with traditional providers delivering vendor-lock-in solutions with limited development, leading to higher maintenance costs, a complex usability, and a limited responsive support.

### Problems Solved by Alternative ADC Systems

Analyzing the ADC market requirements, we can identify problems as

#### Private Lock in

Break free from reliance on vendors for products and services.

#### High Demand

The resource's limitations are caused by the software.

#### Complex Usage

Complex usage makes business slower, and more complicated.

#### Unspecialized Team

Having a mix of talents is necessary to achieve excellence.

#### Quality Costs

High costs and long amortization. Load balancer with restrictions.

#### Target Market

Only large and medium enterprises which implies a 0.15% in the US.

## WHY DO YOU NEED SKUDONET?

### We Ensure Seamless Failover to Ensure Business Continuity

Ensure a **high performance** and **security of IT** services on a **massive scale**, equipping security leaders with a platform that focuses on simplicity and the **lowest maintenance costs**.

#### Scalability

Scalable Solutions for Uninterrupted Data Center Expansion.

#### Performance

High Performance for Data-Intensive Applications.

#### Security

Safeguard your data and applications from potential threats.

## Successful Cases

#### Transform Medical Group (UK)

“ SKUDONET is a nice light product, which services all our needs within our virtualized environment. Building on a stable environment, it is our choice for providing Load Balanced services within Transform.

NICK - SENIOR SYSTEMS ENGINEER

#### Schoolcraft College (USA)

“ We use SKUDONET to Load Balance our two main applications (WebAdvisor & Blackboard) in the College with more than 5000 users. I'd highly recommend The ZVA64 Enterprise Edition 4000 to others.

SHADI - BLACKBOARD SERVERS ADMINISTRATOR

#### Begasoft AG (Switzerland)

“ We saved more than \$10k deprecating private solutions. It is a very good product with passionate and cooperative developers, easy to use and works like a charm! I would recommend this product for everyone without concern.

CHRISTIAN - SYSTEM ADMINISTRATOR

## SKUDONET Born to Avoid the System and IT Services Disruptions

The scalable solution that you need

- Provide an Application Delivery Controller tech focused on simplicity, easy integration, administration, and maintenance.

- Open and public technology development with a qualified community to ensure long and well-supported software.

- Software is not limited by the system resources, allowing high quality service at a low total cost of ownership.

## ENTERPRISE LOAD BALANCER

# Load Balancer Enterprise Edition: Tailored for Large-Scale Production and Extensively Expandable Enviroments

Experience **swift response times**, exceptional **adaptability**, and effortless **usability** with SKUDONET's enterprise solution.

## Application and Networking Control Solution Optimized for Every Platform

You can determine the number of concurrent connections and any resources you need

### VIRTUAL

A **versatile** and **installable** ADC system designed for diverse vendor hardware.

### BAREMETAL

**Sturdy, specialized** ADC hardware for optimal performance gains.

### HARDWARE

**Advanced cyber-se-**  
**curity** solutions catering to your application delivery needs.

### CLOUD

Load Balancing as a **Service** alongside an ADC orchestration **toolkit**.

## Discover the Multi-Platform ADC of the Future

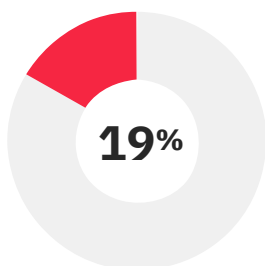

Load balancing and high availabilities of services applications, uplinks and data centers.

Intrusion prevention and detection system with support of local remote blacklist.

Providing a cutting-edge technology and techniques that provide 10x more performance than others.

## Growth of 19% in the ADC Market by 2023

Companies are aware of the need for these solutions.

**Let's get started!**

## SKUDONET'S TECHNICAL SUPPORT

# Elevated Your ADC Experience with Our Complete Technical Support

At SKUDONET, we provide adaptive **technical support programs** and **specialized consulting services** in Business Continuity and Security Advisory. Our goal is to ensure the **seamless operation and security** of your critical business with tailored, advanced solutions.

## SKUDONET Support Plans Ensuring Timely and Efficient Assistance

A wide range of support programs are available to meet your needs

### Subscription

This plan is only if you're already a hero and only require software upgrades and product upgrades.

### 8x5 Support

**Recommend** for those who require updates, upgrades and assistance from heroes only in office hours.

### 24x7 Support

This is for those who require updates, upgrades cybersecurity services and assistance in real time.

**Advanced Cybersecurity**  
Tool for Security Analysis.

**Direct Support**  
Direct Access to Engineering Team

**Continuous Updates**  
Software Updates & Hotfixes

**Less Time Response**  
Responding in less than 24 Hours

## Is Your IT Infrastructure Prepared for your Business Growth?

We work to reduce risks and enable a flexible IT architecture to ensure your business growth, providing consulting and development services to help you.

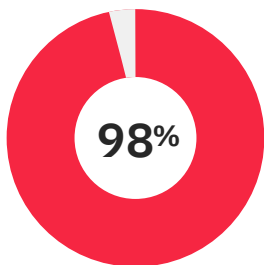

Uninterrupted networks and applications

Elevated the Security of Your IT Services
